Thanks so much Jennifer! I'll do a compare of the appendix and try to make sure BaP and EtO are similar.

I'll let you know if I find out anything new that Vince is looking for in this appendix.

no problem, Kathleen. this is already several years old, but hopefully it's still what they want. i'm sending the link to our 2014 review draft appendices; it hasn't changed since then. you'll find it in Appendix K. good luck! jj

oh, just realized that that's a PDF version, and you might want a WORD version so that you can use the existing table and just tailor it to your needs. so i'm also attaching a WORD file of that version.

Hi again Jennifer, sorry to keep bugging you! Vince commented recently that BaP needs to make revisions to the NRC implementation section in the appendix that are consistent with ethylene oxide. Would you mind sharing this section with me so I can update BaP?

Thanks!
